INCOME TAX—(Continued).

(g) any amounts paid or payable in respect of United Kingdom income tax, or super-tax, or Empire income tax, as defined in sections forty-eight and forty-nine of the Income Tax Ordinance, Cap. 38.

INSURANCE COMPANIES.

In the case of a life insurance company tax is payable on the investment income less the management expenses (including commission), but if the company has its head office outside the colony on a proportion of the investment income calculated according to the ratio of premiums received in the colony to total premiums, less the agency expenses in the colony and a fair proportion of the head office expenses.

In the case of a mutual Insurance Company (other than a Life Insurance Company) incorporated in the colony, tax is payable on the premiums and interest and other income (less premiums returned and/or paid on re-insurance less losses (minus amounts recovered under re-insurance), management expenses, and interest or obligatory or statutory annual payments, subject to an adjustment for unexpired risks.

In the case of an Insurance Company (other than a Life Insurance Company) where the gains or profits accrue in part outside the colony, tax is payable on the premiums and interest and other income received or receivable in the colony (less premiums returned and/or paid on re-insurance) less losses (minus amounts recovered under re-insurance), agency expenses in the colony and a fair proportion of the head office expenses, subject to an adjustment for unexpired risks.

SHIP-OWNERS.

In the case of a British shipowner, on the production of a certificate from the income tax authority of the place where his principal business is situate, tax is payable on a proportion of fares or freights for passengers, goods or mails, shipped in the colony calculated according to the ratio of total profits (as computed by the aforesaid income tax authority) to gross earnings.

NON-RESIDENT TRADERS.

A person not resident in the colony, whether a British subject or not, is assessable and chargeable in respect of any income arising whether directly or indirectly through or from any attorneyship, factorship, agency, receivership, branch or management. Tax is assessable in the name of the attorney, factor, agent, etc., whether the latter has the receipt of the income or not. Where the true amount of the gains or profits cannot be readily ascertained assessment may be made on a fair and reasonable percentage of the turnover of the business done by the non-resident person through or with the resident person in whose name he is chargeable.

MARRIED WOMEN.

The income of a married woman living with her husband is deemed to be his income and is charged in his name, but the wife's proportionate part of the tax may, if necessary, be collected from her.

COMPANIES.

Companies registered in British Guiana are entitled to deduct tax from dividends, and the tax so deductible is set-off against the tax charged on the income (including such dividends) of the shareholder.

PARTNERSHIPS.

A return of the partnership income is required, but each partner's share of the total income of the partnership is assessable in his hands.

INTEREST PAID TO NON-RESIDENTS.

Tax at the rate of 8% is deductible from mortgage or debenture interest paid to a non-resident person by anyone who is entitled to deduct that interest from his gross income. Tax so deducted must be accounted for to the Commissioner of Income Tax.

DOUBLE INCOME TAX RELIEF.

Any person who has paid or is liable to pay British Guiana income tax and has paid or is liable to pay United Kingdom income tax for the same year in respect of the same part of his income is entitled to relief from British Guiana income tax at a rate equal to the excess of the appropriate rate of British Guiana tax over half the appropriate rate of United Kingdom tax, or, if the British Guiana rate exceeds the United Kingdom rate, at half the United Kingdom rate. A certificate issued on behalf of the Commissioners of Inland Revenue in the United Kingdom is receivable in evidence to show what is the appropriate rate of United Kingdom tax in any particular case.

A person liable to British Guiana income tax and to Empire income tax (*i.e.* any income tax charged under any law in force in any part of His Majesty's dominions or in any place under His Majesty's protection other than the United Kingdom or British Guiana) for the same year in respect of the same part of his income is entitled to relief from British Guiana tax :—

- (i) if resident in British Guiana, at the Empire rate or at half the British Guiana rate, whichever is the less; or
- (ii) if not resident in British Guiana, at half the Empire rate or the excess of the British Guiana rate over half the Empire rate, whichever is the less.

The appropriate rate of British Guiana tax is determined by dividing the tax payable for the year (before deduction of the double income tax relief) by the amount of the income in respect of which the British Guiana tax has been charged except that where British Guiana tax has been charged on an amount other than the ascertained amount of the actual profits the rate of tax is determined by the British Guiana Commissioner. The Empire rate of tax is computed in a similar manner.

DUE DATE.

The time for payment is in general within 30 days after the service of a notice of assessment. If tax is not paid within the prescribed period an additional 5 per cent. of its amount is payable.

REPAYMENT.

Claims for repayment of tax paid in excess must be made within two years from the end of the year of assessment.

Pursuant to this Act, an Order of the King in Council providing for the Government of the Colony, and for the constitution of a Legislative Council, was brought into operation on 18th July, 1928. The Court of Policy and Combined Court were thereby abolished and their powers were given to the new Legislative Council. The new Council consists of the Governor as President, of ten Official Members and of nineteen Unofficial Members. The Colonial Secretary and Attorney-General are *ex-officio* members, and of the nineteen unofficial members, fourteen are elected and five nominated by the Governor in pursuance of His Majesty's instructions.

By an Order of the King in Council dated 13th August, 1935, the British Guiana (Constitution) Order in Council, 1928, was amended with regard to the qualifications of voters and further provision was made with regard to the amendment of regulations and proclamations made under the Order of 1928 and the consequences of corrupt or illegal practice committed in reference to elections.

Grazing leases for similar periods at rental of 8 shillings and 4 pence per square mile per annum; cost of survey and preparing title extra. Grazing permissions are renewable annually at a cost of £3 2s. 6d per annum.

Timber leases are granted for tracts exceeding 5,000 acres for such term, at such rental and subject to such special terms and conditions as may be agreed upon, as to rental, &c., royalty to be paid on all forest products removed. Timber licences are usually for a period of 1 year and are subject, ordinarily, to a rental of 2½d. per acre per annum up to 2,000 acres, and ½d. per acre in excess of 2,000; royalty paid on products removed, and a minimum royalty charge of 10 cents for every acre of land comprised in each licence is payable.

Balata licences which only permit of tapping of the balata trees extend from 5 to 15 years, annual rental £4 3s. 4d. royalty on gum produced, filing fee with application, £1 13s. 4d.

Bonds are required in connection with all timber leases and timber and balata licences for the due performance of the conditions of the lease and as security against destruction of the forests.

GENERAL INFORMATION REGARDING THE INDUSTRY AND THE POSSIBILITIES OF DEVELOPMENT.	
<p>The increase in utilization and export of timber continued during 1936. The imports of foreign lumber chiefly Pitch and White Pines increased from 2,101,816 ft. B.M. in 1935 to 2,285,040 ft. B.M. in 1936. The proportion of local timber consumed in the Colony during 1936 was 67% against 67.2% in 1935.</p> <p>The utilization of the principal wood products other than timber and lumber remained about the same as 1935. There was a considerable decrease however in the case of charcoal and an increase in the case of shingles. Balata production decreased from 251,897 lbs. in 1935 to 127,823 lbs. in 1936.</p> <p>There are 22 power-driven Saw-mills in the Colony located as follows:—Georgetown 6, New Amsterdam 5, Waini River 1, Pomeroon River 1, Essequibo Coast 2, Essequibo River 1, West Demerara 4, East Demerara 2. A number of saw-pits for converting timber by hand-power are located in various districts. In Georgetown there are also 7 power-driven wood-working factories.</p> <p>The production of timber increased slightly and the export appreciably both in volume and value. As in 1935 the increase in exports is largely due to the opening up of the market in the U.S.A. Greenheart was 84% of the total exports as against 81% in 1935.</p>

The largest nuggets weighed 9 ozs., 4 ozs. and 3 ozs.

The number of men employed in mining was about 5,000. 35,095

5.—WATER POWER.

The natural water power resources of the Colony are generally believed to be considerable. Kaieteur fall on the Potaro river, the largest of the sources of potential energy, has a perpendicular drop of 741 feet with a width in the rainy season of 400 feet and is situated within feasible distance of present centres of activity. On the numerous rivers there are a number of water-falls which though not of very great height are of considerable volume. No systematic investigation of the water-power resources of the Colony has so far been attempted, but a preliminary examination has been made of the possibilities of some of the most accessible power sites, and it has been decided to examine in greater detail the localities indicated by this inspection to be the most promising. Meanwhile gauging stations have been installed at the following places:—Wismar and Mallali on the Demerara river; Rockstone on the Essequibo river, and Tumatumari on the Potaro river; and at Camaria on the Cuyuni river.

7.—SUMMARY OF INDUSTRIAL DEVELOPMENT.

Trade during the year was unsatisfactory owing to the economic depression throughout the world and the slump in the market price of most of the commodities exported, but there were appreciable, and in some cases, remarkable increases, in the export figures of gold, bauxite, rum and coconuts.

The sugar crop for the Colony for 1936 was 195,944 tons as compared with 178,041 tons in 1935. The area reaped was 63,385 English acres, the average yield of sugar being 3.09 tons per acre. The returns submitted by sugar plantations in the Colony show that in 1936, 61,421 English acres were reaped. 176,505 tons were exported as compared with 174,156 tons in 1935.

The acreage under rice cultivation during 1936 was 51,041 English acres, but the total acreage reaped throughout the Colony, including both Spring and Autumn crops, was 62,856 acres. The total yield of padi was 60,580 tons, equivalent to 36,348 tons of cleaned rice. 20,559 tons of rice were exported as compared with 10,565 tons in 1935.

The output of diamonds was 305,594 stones weighing 40,017 carats, a decrease of 6,546 carats on the previous year's working. The gold production showed an increase of 1,902 ozs., the output being 35,113 ozs. as compared with 33,211 ozs. in 1935.

The production of timber and other forest products compared with that of previous years is as follows:—

ABSTRACT OF THE METEOROLOGICAL OBSERVATIONS. 1936.

Meridian of longitude for calculation of time adopted as			
standard in the Colony	60° W.
Hours slow of Greenwich time	3.45

GEORGETOWN.

The Meteorological Station is situated in the Botanic Gardens at a distance of 1.45 miles south of the coastline. The hours of observation are 7 a.m., 1 p.m. and 6 p.m., local official time which is 3.45 hours behind Greenwich time. The height of the Barometer is 6 feet 6 inches above the mean sea-level.

During the year 1936, the air temperature in the shade as recorded by the dry bulb thermometer for the months of March to November was higher than the mean shade temperature for the past 90 years (1846-1935). The highest temperature recorded was 92.5°F. on October 13, while the lowest was 71.0°F. on the nights of January 19, February 8, 11 and 28. The mean shade temperature for the year was 80.7°F. which is higher than the average from 1846-1935.

The total rainfall was 104.09 inches as compared with 86.35 inches in the year 1935, and with 88.29 inches, the average precipitation for the past 56 years (1880-1935). The total rain fall from January to April inclusive was 31.44 inches or 6.18 inches above the average. For the months of July to December, inclusive, the total rainfall was 45.72 inches or 5.32 inches above the average. The mid-year rains began unusually early in March but ended in August. A period of dry weather ensuing until the end of November. The highest monthly fall, however, 23.27 inches, was in December; the lowest, 1.47 inches was in August. Rain fell on 201 days of the year as compared with 192 days in 1935.

The evaporation from a free water surface, a six-feet square tank at the ground level was 57.28 inches as compared with a normal evaporation of 57.90 inches. The evaporation for 1936 was 54.95 per cent. of the total rainfall.

The total amount of bright sunshine for the year was 2,457.5 hours as compared with 2,482.0 hours in 1935 and with 2,555.6 hours in 1934, and was 17.1 hours below the average from 1846-1935. The mean radiation temperature (blackened bulb in vacuo) was 3.0°F. higher than normal and 0.8°F. low than that of the previous year. The maximum monthly record during the year was 149.8°F. for September, while the highest daily record, 150.0°F. occurred on February 26. The mean minimum temperature on grass was 1.8°F. higher than the average.

The mean velocity of the wind was 6.75 miles per hour. The maximum velocity of the wind as recorded by the anemograph was 29.08 miles per hour at 11.55 a.m. on April 13.

MAZARUNI.

The sub-station at the Forest Station, Mazaruni River, is in longitude 58° 38' 45" W. and latitude 6° 23' 25" N. at a distance of 42 miles south of the coast line. The hours of observation are the same as at the main station in Georgetown. The height of the barometer is 55 feet above the mean sea-level.

During 1936, the mean shade temperature was 77.6°F. The maximum temperature recorded was 93.5°F. on October 13, 15 and 26. The minimum temperature recorded was below 60°F. but unfortunately during February and March when the lowest temperatures were registered, the minimum thermometer was not recording accurately and it is doubtful whether such low temperatures did in fact occur. The total rainfall was 96.03 inches or 0.57 inch higher than that of the previous year, and 8.06 inches lower than that of Georgetown. Rain fell on 250 days, as compared with 201 in Georgetown. The total amount of bright sunshine recorded during the year was 1,829.3 hours as compared with 2,457.5 hours at Georgetown.

TELEGRAPH CABLES.

Between Colony and	Name of Company.
Barbados and beyond	West India and Panama Telegraph Company

NOTE.—The Pacific and West Indian Telegraph Undertaking has been sold to a Communications Company for a sum of £300,000 and the purchase price paid has been applied to the reduction of the West Indian Telegraph Loan. This has thereby been reduced to £71,745 and the debt now outstanding can be discharged either by annuity or by a lump sum payment. This Colony's share of the capital liability is £8,185, which can be discharged by an annuity of £575 for 25 years. The result of the sale will, therefore, be the exchange of the indefinite annual liability for a fixed annual payment for a limited period, substantially smaller in amount than that which this Government has paid in the past. The Communications Company will be under the control of the several Governments concerned through an Advisory Committee to the extent that the Company will be required to consult the Advisory Committee on questions of policy, including any alteration in rates, and without whose assent no increase of rates prevailing at the date of the formation of the Company is to be made. (M.P. 1846/29).
